

INSTRUCTIONS

Only report microbiological results that are available on the day of the survey. Do not report microbiological results that become available after the day of the survey. This ensures comparability of data collection between LTCFs and countries.

STEP ONE

Specify up to three isolated microorganisms, using the microorganism code list (in the next page).

If no microbiological result is available on the day of the PPS, one of the following options should be selected:

_NOEXA	EXAMINATION NOT DONE	No diagnostic sample taken, no microbiological examination done.
_NA	RESULTS NOT AVAILABLE	The results of the microbiological examination are not (yet) available or cannot be found.
_NONID	MICROORGANISM NOT IDENTIFIED	Evidence exists that a microbiological examination has been done, but the microorganism cannot be correctly classified.
_STERI	STERILE EXAMINATION	A microbiological examination has been done, but the result was negative (e.g. negative culture).

STEP TWO

For each reported microorganism **HIGHLIGHTED IN RED**, indicate the susceptibility using the table below.

Microorganism	Tested antibiotic ²	Antimicrobial resistance			
<i>Staphylococcus aureus</i> (STAAUR)	Oxacillin (OXA)	Susceptible (S)	–	Resistant (R)	Unknown (U)
	Glycopeptides (GLY)	Susceptible (S)	Susceptible, increased exposure (I)	Resistant (R)	Unknown (U)
<i>Enterococcus species</i> (ENC***)	Glycopeptides (GLY)	Susceptible (S)	Susceptible, increased exposure (I)	Resistant (R)	Unknown (U)
<i>Enterobacteriales</i> ¹ , including: <i>Escherichia coli</i> (ESCCOL) <i>Klebsiella</i> species (KLE***) <i>Enterobacter</i> species (ENB***) <i>Proteus</i> species (PRT***) <i>Citrobacter</i> species (CIT***) <i>Serratia</i> species (SER***) <i>Morganella</i> species (MOGSPP)	Third-generation cephalosporins (C3G)	Susceptible (S)	Susceptible, increased exposure (I)	Resistant (R)	Unknown (U)
	Carbapenems (CAR)	Susceptible (S)	Susceptible, increased exposure (I)	Resistant (R)	Unknown (U)
<i>Pseudomonas aeruginosa</i> (PSEAER)	Carbapenems (CAR)	Susceptible (S)	Susceptible, increased exposure (I)	Resistant (R)	Unknown (U)
<i>Acinetobacter baumannii</i> (ACIBAU)	Carbapenems (CAR)	Susceptible (S)	Susceptible, increased exposure (I)	Resistant (R)	Unknown (U)

¹ Antimicrobial resistance markers are not collected for other *Enterobacteriales* (e.g. *Hafnia* spp., *Salmonella* spp., *Shigella* spp., *Yersinia* spp.)

² OXA: susceptibility to oxacillin, or other marker of MRSA, such as cefoxitin, cloxacillin, dicloxacillin, flucloxacillin, meticillin;

GLY: susceptibility to glycopeptides: vancomycin or teicoplanin;

C3G: susceptibility to third-generation cephalosporins: cefotaxime, ceftriaxone, ceftazidime;

CAR: susceptibility to carbapenems: imipenem, meropenem, doripenem.
